
General information

This journal is published in open access as part of the EDP Sciences' Subscribe to Open program (see <https://www.edpsciences.org/en/faqs-the-edp-sciences-subscribe-to-open-programme>).

Under this programme, your article will be published in open access free of charge. The cost to publish the journal in open access is covered by existing subscriptions under the Subscribe to Open programme, and by the National Open Access Agreement in France.

To support the Subscribe to Open model, you can encourage your library to subscribe to the journal, and lower subscription costs for all participating institutions. Please contact subscribers@edpsciences.org.

Please fill in the following open access form and license agreement form (pages 2 and 3).

The filled-in forms should be returned to EDP Sciences through your SAGA account at: <https://www.edpsciences.org>

★ IMPORTANT NOTICE

If your institution is a part of the **National Open Access Agreement in France** (e.g. CNRS, CEA, large number of French Universities ...), then please tick the correct option on page 2, as open access charges are already covered by transformative agreements with these institutions.

For more information about the National Open Access Agreement in France, please refer to:
<https://www.edpsciences.org/en/national-open-access-agreement-in-france>

Open access

- Your institution is covered by the **national open access agreement in France**. The open access publication of your article is covered by institutions participating in the national open access agreement.
- Your institution is not covered by the **national open access agreement in France**.

Whatever option your article will be published in open access free of charge. *Please fill in the license agreement form (page 3).*

License agreement

Title: A mean-field stochastic linear-quadratic optimal control problem with jumps under partial information

Author(s): Yiyun Yang, Maoning Tang, Qingxin Meng

The license has to be sent to the production department with your proofs.

In submitting a document to *ESAIM: Control, Optimisation and Calculus of Variations*, I certify to the Publisher that:

1. I am authorized by my co-authors to enter into these arrangements.
2. I warrant, on behalf of myself and my co-authors, that:
 - the document is original, has not been formally published in any other peer-reviewed journal, is not under consideration by any other journal and does not infringe any existing copyright or any other third party rights;
 - I am/we are the sole author(s) of the article and have full authority to enter into this agreement and in granting rights to the Publisher that are not in breach of any other obligation;
 - If the law requires that the article be published in the public domain, I/we will notify the Publisher at the time of submission upon which clause 3 do not apply;
 - the document contains nothing that is unlawful, libelous, or which would, if published, constitute a breach of contract or of confidence or of commitment given to secrecy;
 - I/we have taken due care to ensure the integrity of the article. To my/our – and currently accepted scientific – knowledge all statements contained in it purporting to be facts are true and any formula or instruction contained in the article will not, if followed accurately, cause any injury, illness or damage to the user.
3. I agree to the Creative Commons Attribution License (<https://creativecommons.org/licenses/by/4.0/>).
